SUBJECT INDEX VOLUME 78 • 1999

Explanation of Symbols:

The page number on which an article begins is listed at the end of that article's title. An article may appear under more than one heading.

Author names are listed alphabetically. Numbers listed after each name are the page numbers of the article(s) on which their name appears.

AADR (*see* IADR/AADR)

ABRASION (*see* Tooth Abrasion)

ABRASION RESISTANCE
Three-body wear of a hand-consolidated silver alternative to amalgam. Xu, H.H.K., *et al.*, 1560

ABSTRACTS
Divisional Abstracts, 918
IADR Abstracts, 106–623

ACID ETCHING, DENTAL
Acid-etching and hydration influence on dentin roughness and wettability. Rosales, J.I., *et al.*, 1554
Long-term durability of dentin bonds made with a self-etching primer, *in vivo*. Sano, H., *et al.*, 906

ACTINOBACILLUS
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77

ACTINOBACILLUS ACTINOMYCETEMCOMITANS
Anti-proliferative capsular-like polysaccharide antigen from *Actinobacillus actinomycetemcomitans* induces apoptotic cell death in mouse osteoblastic MC3T3-E1 cells. Yamamoto, S., *et al.*, 1230
Clonal infection with *Actinobacillus actinomycetemcomitans* following periodontal therapy. Ehmke, B., *et al.*, 1518
Extracts of *Actinobacillus actinomycetemcomitans* induce apoptotic cell death in human osteoblastic MG63 cells. Morimoto, Y., *et al.*, 735

ACTINOMYCES
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634
Predominant *Actinomyces* spp. isolated from infected dentin of active root caries lesions, The. Brailsford, S.R., *et al.*, 1525
Secretory immunoglobulin A heavy chain presents Galb1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

ACTINOMYCES NAESLUNDII
Diversity and distribution of the predominant ribotypes of *Actinomyces naeslundii* genospecies 1 and 2 in samples from enamel and from healthy and carious root surfaces of teeth, The. Bowden, G.H.W., *et al.*, 1800
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245

ADHESION (*see* Bacterial Adhesion)

AGE OF ONSET
Age of onset of dental anxiety. Locker, D., *et al.*, 790

AGED
Natural defenses against Candida colonization breakdown in the oral cavities of the elderly. Lockhart, S.R., *et al.*, 857
Preventive dental behaviors and their association with oral health status in older white men. Boehmer, U., *et al.*, 869
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640
Variations in dental anxiety among middle-aged and elderly women in Sweden: a longitudinal study between 1968 and 1996. Hägglin, C., *et al.*, 1655

ALKALINE PHOSPHATASE
Enhancement by recombinant human bone morphogenetic protein-2 of bone formation by means of porous hydroxyapatite in mandibular bone defects. Yoshida, K., *et al.*, 1505
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221

ALPHA 1-ACID GLYCOPROTEIN (*see* Orosomucoid)

ALUMINUM
Contact damage resistance and strength degradation of glass-infiltrated alumina and spinel ceramics. Jung, Y.-G., *et al.*, 804

ALUMINUM SILICATES
Stoichiometry of the leaching process of fluoride-containing aluminosilicate glass-ionomer glasses. De Maeyer, E.A.P., *et al.*, 1312

ALVEOLAR BONE
Prenatal development of the alveolar bone of human deciduous incisors and canines. Kjær, I. and Bagheri, A., 667

ALVEOLAR BONE LOSS
Adjusting estimates of alveolar bone loss for missing observations: developing and testing a general model. Schuller, A.A., *et al.*, 661
Non-steroidal anti-inflammatory drugs for altering periodontal bone loss. Williams, R.C., 638

AMELOBLASTS
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743

AMELOGENESIS
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743
Voyage to the land of developmental enamel mineralization. Aoba, T., 1673

AMELOGENIN
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743
Identification of the chondrogenic-inducing activity from bovine dentin (bCIA) as a low-molecular-mass amelogenin polypeptide. Nebgen, D.R., *et al.*, 1484

α-AMINO-3-HYDROXY-5-METHYLISOZAZOLE-4-PROPIONIC ACID (AMPA)
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54

SUBJECT INDEX VOLUME 78 • 1999

AADR (*see* IADR/AADR)

ABRASION (*see* Tooth Abrasion)

ABRASION RESISTANCE
Three-body wear of a hand-consolidated silver alternative to amalgam. Xu, H.H.K., *et al.*, 1560

ABSTRACTS
Divisional Abstracts, 918
IADR Abstracts, 106–623

ACID ETCHING, DENTAL
Acid-etching and hydration influence on dentin roughness and wettability. Rosales, J.I., *et al.*, 1554
Long-term durability of dentin bonds made with a self-etching primer, *in vivo*. Sano, H., *et al.*, 906

ACTINOBACILLUS
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77

ACTINOBACILLUS ACTINOMYCETEMCOMITANS
Anti-proliferative capsular-like polysaccharide antigen from *Actinobacillus actinomycetemcomitans* induces apoptotic cell death in mouse osteoblastic MC3T3-E1 cells. Yamamoto, S., *et al.*, 1230
Clonal infection with *Actinobacillus actinomycetemcomitans* following periodontal therapy. Ehmke, B., *et al.*, 1518
Extracts of *Actinobacillus actinomycetemcomitans* induce apoptotic cell death in human osteoblastic MG63 cells. Morimoto, Y., *et al.*, 735

ACTINOMYCES
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634
Predominant *Actinomyces* spp. isolated from infected dentin of active root caries lesions, The. Brailsford, S.R., *et al.*, 1525
Secretory immunoglobulin A heavy chain presents Galb1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

ACTINOMYCES NAESLUNDII
Diversity and distribution of the predominant ribotypes of *Actinomyces naeslundii* genospecies 1 and 2 in samples from enamel and from healthy and carious root surfaces of teeth, The. Bowden, G.H.W., *et al.*, 1800
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245

ADHESION (*see* Bacterial Adhesion)

AGE OF ONSET
Age of onset of dental anxiety. Locker, D., *et al.*, 790

AGED
Natural defenses against Candida colonization breakdown in the oral cavities of the elderly. Lockhart, S.R., *et al.*, 857
Preventive dental behaviors and their association with oral health status in older white men. Boehmer, U., *et al.*, 869
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640
Variations in dental anxiety among middle-aged and elderly women in Sweden: a longitudinal study between 1968 and 1996. Hägglin, C., *et al.*, 1655

ALKALINE PHOSPHATASE
Enhancement by recombinant human bone morphogenetic protein-2 of bone formation by means of porous hydroxyapatite in mandibular bone defects. Yoshida, K., *et al.*, 1505
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221

ALPHA 1-ACID GLYCOPROTEIN (*see* Orosomucoid)

ALUMINUM
Contact damage resistance and strength degradation of glass-infiltrated alumina and spinel ceramics. Jung, Y.-G., *et al.*, 804

ALUMINUM SILICATES
Stoichiometry of the leaching process of fluoride-containing aluminosilicate glass-ionomer glasses. De Maeyer, E.A.P., *et al.*, 1312

ALVEOLAR BONE
Prenatal development of the alveolar bone of human deciduous incisors and canines. Kjær, I. and Bagheri, A., 667

ALVEOLAR BONE LOSS
Adjusting estimates of alveolar bone loss for missing observations: developing and testing a general model. Schuller, A.A., *et al.*, 661
Non-steroidal anti-inflammatory drugs for altering periodontal bone loss. Williams, R.C., 638

AMELOBLASTS
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743

AMELOGENESIS
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743
Voyage to the land of developmental enamel mineralization. Aoba, T., 1673

AMELOGENIN
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743
Identification of the chondrogenic-inducing activity from bovine dentin (bCIA) as a low-molecular-mass amelogenin polypeptide. Nebgen, D.R., *et al.*, 1484

α-AMINO-3-HYDROXY-5-METHYLISOZAZOLE-4-PROPIONIC ACID (AMPA)
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54

AMYLASES
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759

ANTI-INFLAMMATORY AGENTS, NON-STEROIDAL
Non-steroidal anti-inflammatory drugs for altering periodontal bone loss. Williams, R.C., 638
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769

ANTIBIOTICS, PEPTIDE
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245

ANTIBODIES, MONOCLONAL
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77

ANTIFUNGAL AGENTS
Construction and characterization of human salivary histatin-5 multimers. Situ, H., *et al.*, 690

ANTIGENS, BACTERIAL
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77

ANTISERA (*see* Immune Sera)

ANXIETY (*see* Dental Anxiety)

APOPTOSIS
Anti-proliferative capsular-like polysaccharide antigen from *Actinobacillus actinomycetemcomitans* induces apoptotic cell death in mouse osteoblastic MC3T3-E1 cells. Yamamoto, S., *et al.*, 1230
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal repair. Funato, N., *et al.*, 1511
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345
Extracts of *Actinobacillus actinomycetemcomitans* induce apoptotic cell death in human osteoblastic MG63 cells. Morimoto, Y., *et al.*, 735

ARACHIDONIC ACIDS
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61

AROUSAL
Controlled daytime challenge of motor performance and vigilance in sleep bruxers, A. Major, M., *et al.*, 1754

ARTHRITIS, JUVENILE RHEUMATOID
Mandibulofacial adaptations in a juvenile animal model of temporomandibular joint arthritis. Tavakkoli-Jou, M., *et al.*, 1426

ATROPHY
Morphological and functional characteristics of acinar atrophy and recovery in the duct-ligated parotid gland of the rat. Scott, J., *et al.*, 1711

AUTONOMIC NERVOUS SYSTEM
Origin of sensory and autonomic innervation of the rate temporomandibular joint: a retrograde axonal tracing study with the fluorescent dye fast blue. Casatti, C.A., *et al.*, 776

AXONS
Origin of sensory and autonomic innervation of the rate temporomandibular joint: a retrograde axonal tracing study with the fluorescent dye fast blue. Casatti, C.A., *et al.*, 776

BACTERIA
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410
Quantification of bacteria in oral samples by competitive polymerase chain reaction. Rupf, S., *et al.*, 850
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640

BACTERIA, ANAEROBIC
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634

BACTERIAL ADHESION
Secretory immunoglobulin A heavy chain presents Galβ1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

BACTERIAL INFECTIONS
Predominant *Actinomyces* spp. isolated from infected dentin of active root caries lesions, The. Brailsford, S.R., *et al.*, 1525

BACTERIAL TYPING TECHNIQUES
Diversity and distribution of the predominant ribotypes of *Actinomyces naeslundii* genospecies 1 and 2 in samples from enamel and from healthy and carious root surfaces of teeth, The. Bowden, G.H.W., *et al.*, 1800

BASAL CELL NEVUS SYNDROME
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

BIODEGRADATION
Biodegradation of commercial dental composites by cholesterol esterase. Santerre, J.P., *et al.*, 1459

BIOFILMS
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245

BIOMECHANICS
Intra-articular distance within the TMJ during free and loaded closing movements, The. Huddleston Slater, J.J.R., *et al.*, 1815
Theoretical optimal center of rotation for a temporomandibular joint prosthesis, The: a three-dimensional kinematic study. van Loon, J.-P., *et al.*, 43

BISPHENOL A-GLYCIDYL METHACRYLATE
Effects of light intensity, temperature, and comonomer composition on the polymerization behavior of dimethacrylate dental resins, The. Lovell, L.G., *et al.*, 1469

BITE FORCE
Contribution of jaw muscle size and craniofacial morphology to human bite force magnitude. Raadsheer, M.C., *et al.*, 31
Influence of clenching intensity on bite force balance, occlusal contact area, and average bite pressure. Hidaka, O., *et al.*, 1336
Masticatory force and function in patients with hemispheric brain infarction and hemiplegia. Kemppainen, P., *et al.*, 1810
Speed-dependent control of cyclic open-close movements of the human jaw with an

external force counteracting closing. Abbink, J.H., *et al.*, 878

BLOOD CIRCULATION
Blood circulation as source for osteopontin in acellular extrinsic fiber cementum and other mineralizing tissues. VandenBos, T., *et al.*, 1688
Cold pressor stimulation effect on hemodynamic changes following sustained isometric contraction in human jaw-closure muscles. Tsukiyama, Y., *et al.*, 1727

BONDING (*see* Dental Bonding; Dentin-bonding Agents)

BONE AND BONES
Blood circulation as source for osteopontin in acellular extrinsic fiber cementum and other mineralizing tissues. VandenBos, T., *et al.*, 1688

BONE LOSS, PERIODONTAL (*see* Alveolar Bone Loss)

BONE MATRIX
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495

BONE MINERALIZATION (*see* Calcification, Physiologic)

BONE MORPHOGENETIC PROTEINS
Enhancement by recombinant human bone morphogenetic protein-2 of bone formation by means of porous hydroxyapatite in mandibular bone defects. Yoshida, K., *et al.*, 1505
Identification of the chondrogenic-inducing activity from bovine dentin (bCIA) as a low-molecular-mass amelogenin polypeptide. Nebgen, D.R., *et al.*, 1484
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624

BONE RESORPTION
Autocrine regulation of osteoclast formation and bone resorption by IL-1α and TNFα. Tani-Ishii, N., *et al.*, 1617
Non-steroidal anti-inflammatory drugs for altering periodontal bone loss. Williams, R.C., 638

BONE SUBSTITUTES
Implantation of octacalcium phosphate (OCP) in rat skull defects enhances bone repair. Kamakura, S., *et al.*, 1682

BRUXISM
Controlled daytime challenge of motor performance and vigilance in sleep bruxers, A. Major, M., *et al.*, 1754
Occlusal disharmonies modulate central catecholaminergic activity in the rat. Areso, M.P., *et al.*, 1204

CADAVERINE
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696

CALCIFICATION, PHYSIOLOGIC
Blood circulation as source for osteopontin in acellular extrinsic fiber cementum and other mineralizing tissues. VandenBos, T., *et al.*, 1688
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221
Voyage to the land of developmental enamel mineralization. Aoba, T., 1673

CALCITONIN GENE-RELATED PEPTIDE
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

CALCIUM
Morphologic and biochemical changes of the masseter muscles induced by occlusal wear: studies in a rat model. Bani, D., *et al.*, 1735

CALCIUM PHOSPHATE
Implantation of octacalcium phosphate (OCP) in rat skull defects enhances bone repair. Kamakura, S., *et al.*, 1682

CALPAIN
Structure/function analysis of human cystatin SN and comparison of the cysteine proteinase inhibitory profiles of human cystatins C and SN. Hiltke, T.R., *et al.*, 1401

CANDIDA
Construction and characterization of human salivary histatin-5 multimers. Situ, H., *et al.*, 690
Natural defenses against Candida colonization breakdown in the oral cavities of the elderly. Lockhart, S.R., *et al.*, 857
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640

CANDIDA ALBICANS
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

CANINE TOOTH (*see* Cuspid)

CAPNOCYTOPHAGA
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634

CAPSAICIN
Capsaicin induces cystatin S-like substances in submandibular saliva of the rat. Katsukawa, H. and Ninomiya, Y., 1609

CARBOHYDRATES
Growth of viridans streptococci on human serum a_1-acid glycoprotein. Byers, H.L., *et al.*, 1370

CARCINOGENIC TRANSFORMATION (*see* Cell Transformation, Neoplastic)

CARCINOMA, SQUAMOUS CELL
92K-GL (MMP-9) and 72K-GL (MMP-2) are produced *in vivo* by human oral squamous cell carcinomas and can enhance FIB-CL (MMP-1) activity *in vitro*. Pickett, K.L., *et al.*, 1354
Keratin 19 downregulation by oral squamous cell carcinoma lines increases invasive potential. Crowe, D.L., *et al.*, 1256

CARTILAGE
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495

CATECHOLAMINES
Occlusal disharmonies modulate central catecholaminergic activity in the rat. Areso, M.P., *et al.*, 1204

CATS
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

CD11B ANTIGEN (*see* Macrophage-1 Antigen)

cDNA (*see* DNA, Complementary)

CELL CYCLE
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

CELL DEATH, PROGRAMMED (*see* Apoptosis)

CELL DIFFERENTIATION
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495
Production of matrix-degrading enzymes and inhibition of osteoclast-like cell differentiation by fibroblast-like cells from the periodontal ligament of human primary teeth. Wu, Y.-M., *et al.*, 681
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673

CELL MOVEMENT
Keratin 19 downregulation by oral squamous cell carcinoma lines increases invasive potential. Crowe, D.L., *et al.*, 1256

CELL TRANSFORMATION, NEOPLASTIC
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264

CEPHALOMETRY
Mandibulofacial adaptations in a juvenile animal model of temporomandibular joint arthritis. Tavakkoli-Jou, M., *et al.*, 1426

CERAMICS
Ceramic whisker reinforcement of dental resin composites. Xu, H.H.K., *et al.*, 706
Contact damage resistance and strength degradation of glass-infiltrated alumina and spinel ceramics. Jung, Y.-G., *et al.*, 804
Damage modes in dental layer structures. Jung, Y.-G., *et al.*, 887
Dental composite resins containing silica-fused ceramic single-crystalline whiskers with various filler levels. Xu, H.H.K., 1304

CEREBRAL INFARCTION
Masticatory force and function in patients with hemispheric brain infarction and hemiplegia. Kemppainen, P., *et al.*, 1810

CEREBROVASCULAR DISORDERS
Masticatory force and function in patients with hemispheric brain infarction and hemiplegia. Kemppainen, P., *et al.*, 1810

CHEEK
Origin of primary sensory neurons innervating the buccal stretch receptor. Yamamoto, T., *et al.*, 49

CHEMOTACTIC FACTORS
Migration inhibitory factor related protein-8 (MRP-8) is an autocrine chemotactic factor for periodontal ligament cells. Nishimura, F., *et al.*, 1251

CHEMOTAXIS
Synthesis and secretion of MCP-1 by dental follicle cells—implications for tooth eruption. Wise, G.E., *et al.*, 1677

CHEWING (*see* Mastication)

CHEWING GUM
Optimum time to initiate habitual xylitol gum-chewing for obtaining long-term caries prevention, The. Hujoel, P.P., 797

CHILDREN
Optimum time to initiate habitual xylitol gum-chewing for obtaining long-term caries prevention, The. Hujoel, P.P., 797
Randomized clinical trial of triazolam in 3- to 5-year olds, A. Raadal, M., *et al.*, 1197

CHLORPHENYLAMINE
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769

CHOLESTEROL ESTERASE
Biodegradation of commercial dental composites by cholesterol esterase. Santerre, J.P., *et al.*, 1459

CHONDROGENESIS
Identification of the chondrogenic-inducing activity from bovine dentin (bCIA) as a low-molecular-mass amelogenin polypeptide. Nebgen, D.R., *et al.*, 1484

CHROMOSOME, HUMAN, PAIR 4
Genetic linkage of the dentinogenesis imperfecta type III locus to chromosome 4q. MacDougall, M., *et al.*, 1277
Refinement of the dentinogenesis imperfecta type II locus to an interval less than 2 centiMorgans at chromosome 4q21 and the creation of yeast artificial chromosome contig of the critical region. Aplin, H.M., *et al.*, 1270

CHROMOSOMES, YEAST ARTIFICIAL
Refinement of the dentinogenesis imperfecta type II locus to an interval less than 2 centiMorgans at chromosome 4q21 and the creation of yeast artificial chromosome contig of the critical region. Aplin, H.M., *et al.*, 1270

CLEFT LIP
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

CLEFT PALATE
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

CLOSTRIPAIN
Structure/function analysis of human cystatin SN and comparison of the cysteine proteinase inhibitory profiles of human cystatins C and SN. Hiltke, T.R., *et al.*, 1401

COHEN, LOIS RUTH KUSHNER
Emergence of the social and behavioral sciences in dentistry, The: Lois Cohen as principal architect. Dworkin, S.F., 1192

COLD PRESSOR STIMULATION
Cold pressor stimulation effect on hemodynamic changes following sustained isometric contraction in human jaw-closure muscles. Tsukiyama, Y., *et al.*, 1727

COLLAGEN
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Enhancement by recombinant human bone morphogenetic protein-2 of bone formation by means of porous hydroxyapatite in mandibular bone defects. Yoshida, K., *et al.*, 1505
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11

COLLAGENASES
92K-GL (MMP-9) and 72K-GL (MMP-2) are produced *in vivo* by human oral squamous cell carcinomas and can enhance FIB-CL (MMP-1) activity *in vitro*. Pickett, K.L., *et al.*, 1354
Stretching the boundaries of conventional thought: Larry Golub and the tetracycline story. Greenwald, R.A., 820

COMPOSITES
Biodegradation of commercial dental composites by cholesterol esterase. Santerre, J.P., *et al.*, 1459
Ceramic whisker reinforcement of dental resin composites. Xu, H.H.K., *et al.*, 706
Dental composite resins containing silica-fused ceramic single-crystalline whiskers with various filler levels. Xu, H.H.K., 1304
Effects of dentin depth and cavity configuration on bond strength. Yoshikawa, T., *et al.*, 898
Effects of light intensity, temperature, and comonomer composition on the polymerization behavior of dimethacrylate dental resins, The. Lovell, L.G., *et al.*, 1469
Fluoride release from restorative materials and its effects on dentin demineraliza-

tion. Francci, C., *et al.*, 1647
Long-term durability of dentin bonds made with a self-etching primer, *in vivo*. Sano, H., *et al.*, 906

CONDYLE (*see* Mandibular Condyle)

CONTIG MAPPING
Refinement of the dentinogenesis imperfecta type II locus to an interval less than 2 centiMorgans at chromosome 4q21 and the creation of yeast artificial chromosome contig of the critical region. Aplin, H.M., *et al.*, 1270

CORONARY DISEASE
Association between extent of periodontal attachment loss and self-reported history of heart attack: an analysis of NHANES III data. Arbes, S.J., Jr., *et al.*, 1777

CORROSION
Effect of fluoride concentration and pH on corrosion behavior of titanium for dental use. Nakagawa, M., *et al.*, 1568

CRACKS (*see* Fractures)

CRANIAL NERVES
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

CRANIOFACIAL BONES (*see* Facial Bones)

CRANIOMANDIBULAR DISORDERS
Mandibulofacial adaptations in a juvenile animal model of temporomandibular joint arthritis. Tavakkoli-Jou, M., *et al.*, 1426
Nocturnal masseter EMG activity of healthy subjects in a natural environment. Gallo, L.M., *et al.*, 1436

CROSS-CULTURAL COMPARISONS
Cross-cultural study of oral health values, A. Allison, P., *et al.*, 643

CROSS-LINKING REAGENTS
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696

CROWNS, DENTAL (*see* Dental Crowns)

CULTURAL CHARACTERISTICS
Cross-cultural study of oral health values, A. Allison, P., *et al.*, 643

CUSPID
Prenatal development of the alveolar bone of human deciduous incisors and canines. Kjær, I. and Bagheri, A., 667

CYCLIN D1
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

CYCLOXYGENASE (*see* Prostaglandin-Endoperoxide Synthase)

CYSTATINS
Capsaicin induces cystatin S-like substances in submandibular saliva of the rat. Katsukawa, H. and Ninomiya, Y., 1609
Sequence variations of the *CST2* gene related to the polymorphism of salivary cystatin SA. Haga, T. and Minaguchi, K., 835
Structure/function analysis of human cystatin SN and comparison of the cysteine proteinase inhibitory profiles of human cystatins C and SN. Hiltke, T.R., *et al.*, 1401

CYSTEINE PROTEINASES
Capsaicin induces cystatin S-like substances in submandibular saliva of the rat. Katsukawa, H. and Ninomiya, Y., 1609
Structure/function analysis of human cystatin SN and comparison of the cysteine proteinase inhibitory profiles of human cystatins C and SN. Hiltke, T.R., *et al.*, 1401

CYTOKINES
Depressed responsiveness of peripheral blood mononuclear cells to heat-shock proteins in periodontitis patients. Petit, M.D.A., *et al.*, 1393
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61

DATA INTERPRETATION, STATISTICAL
Adjusting estimates of alveolar bone loss for missing observations: developing and testing a general model. Schuller, A.A., *et al.*, 661

DECORIN
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

DEGLUTITION
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

DEMINERALIZATION (*see* Tooth Demineralization)

DENDRITIC CELLS
Co-increase of nerve fibers and HLA-DR- and/or factor-XIIIa-expressing dendritic cells in dentinal caries-affected regions of the human dental pulp: an immunohistochemical study. Sakurai, K., *et al.*, 1596
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214
Langerhans cells from oral epithelium are more effective in stimulating allogeneic T-cells *in vitro* than Langerhans cells from skin epithelium. Hasséus, B., *et al.*, 751

DENTAL AMALGAM
In vitro lymphoproliferative assays with $HgCl_2$ cannot identify patients with systemic symptoms attributed to dental amalgam. Cederbrant, K., *et al.*, 1450
Longevity of extensive class II open-sandwich restorations with a resin-modified glass-ionomer cement. van Dijken, J.W.V., *et al.*, 1319
Three-body wear of a hand-consolidated silver alternative to amalgam. Xu, H.H.K., *et al.*, 1560

DENTAL ANXIETY
Age of onset of dental anxiety. Locker, D., *et al.*, 790
Randomized clinical trial of triazolam in 3- to 5-year olds, A. Raadal, M., *et al.*, 1197
Variations in dental anxiety among middle-aged and elderly women in Sweden: a longitudinal study between 1968 and 1996. Hägglin, C., *et al.*, 1655

DENTAL ARCH
Thickness of acquired salivary pellicle as a determinant of the sites of dental erosion. Amaechi, B.T., *et al.*, 1821

DENTAL BONDING
Acid-etching and hydration influence on dentin roughness and wettability. Rosales, J.I., *et al.*, 1554

Effect of moist *vs.* dry bonding to normal *vs.* caries-affected dentin with Scotchbond Multi-Purpose Plus. Nakajima, M., *et al.*, 1298
Effects of dentin depth and cavity configuration on bond strength. Yoshikawa, T., *et al.*, 898
Regional measurement of resin-dentin bonding as an array. Shono, Y., *et al.*, 699

DENTAL CARE
Guest editorial: tradition-based dental care and evidence-based dental care. Niederman, R. and Badovinac, R., 1288

DENTAL CARIES
Co-increase of nerve fibers and HLA-DR- and/or factor-XIIIa-expressing dendritic cells in dentinal caries-affected regions of the human dental pulp: an immunohistochemical study. Sakurai, K., *et al.*, 1596
Diversity and distribution of the predominant ribotypes of *Actinomyces naeslundii* genospecies 1 and 2 in samples from enamel and from healthy and carious root surfaces of teeth, The. Bowden, G.H.W., *et al.*, 1800
Effect of moist *vs.* dry bonding to normal *vs.* caries-affected dentin with Scotchbond Multi-Purpose Plus. Nakajima, M., *et al.*, 1298
Glass-ionomer restoratives: a systematic review of a secondary caries treatment effect. Randall, R.C. and Wilson, N.H.F., 628
Longevity of extensive class II open-sandwich restorations with a resin-modified glass-ionomer cement. van Dijken, J.W.V., *et al.*, 1319
Optimum time to initiate habitual xylitol gum-chewing for obtaining long-term caries prevention, The. Hujoel, P.P., 797
Predominant *Actinomyces* spp. isolated from infected dentin of active root caries lesions, The. Brailsford, S.R., *et al.*, 1525
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640

DENTAL CAVITY PREPARATION
Acid-etching and hydration influence on dentin roughness and wettability. Rosales, J.I., *et al.*, 1554
Effects of dentin depth and cavity configuration on bond strength. Yoshikawa, T., *et al.*, 898
Localization and changes in NADPH-diaphorase reactivity and nitric oxide synthase immunoreactivity in rat pulp following tooth preparation. Law, A.S., *et al.*, 1585
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673

DENTAL CEMENTS
Glass-ionomer restoratives: a systematic review of a secondary caries treatment effect. Randall, R.C. and Wilson, N.H.F., 628
Ion distribution in matrix parts of glass-polyalkenoate cement by SIMS. Maeda, T., *et al.*, 86
Longevity of extensive class II open-sandwich restorations with a resin-modified glass-ionomer cement. van Dijken, J.W.V., *et al.*, 1319
Stoichiometry of the leaching process of fluoride-containing aluminosilicate glass-ionomer glasses. De Maeyer, E.A.P., *et al.*, 1312

DENTAL CEMENTUM
Blood circulation as source for osteopontin in acellular extrinsic fiber cementum and other mineralizing tissues. VandenBos, T., *et al.*, 1688
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221

DENTAL CROWNS
Contact damage resistance and strength degradation of glass-infiltrated alumina and spinel ceramics. Jung, Y.-G., *et al.*, 804

DENTAL DEVICES, HOME CARE
Preventive dental behaviors and their association with oral health status in older white men. Boehmer, U., *et al.*, 869

DENTAL ENAMEL
Diversity and distribution of the predominant ribotypes of *Actinomyces naeslundii* genospecies 1 and 2 in samples from enamel and from healthy and carious root surfaces of teeth, The. Bowden, G.H.W., *et al.*, 1800
Influence of antagonist standardization on wear. Krejci, I., *et al.*, 713
Kinetics of enamel demineralization *in vitro*. Margolis, H.C., *et al.*, 1326
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696
Voyage to the land of developmental enamel mineralization. Aoba, T., 1673

DENTAL ENAMEL PROTEINS
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743

DENTAL FLOSS
(*see* Dental Devices, Home Care)

DENTAL HEALTH SURVEYS
Cross-cultural study of oral health values, A. Allison, P., *et al.*, 643

DENTAL IMPLANTS
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: evaluation of masticatory function, A. Tang, L., *et al.*, 1544

DENTAL MATERIALS
Fluoride release from restorative materials and its effects on dentin demineralization. Francci, C., *et al.*, 1647

DENTAL OCCLUSION
Influence of antagonist standardization on wear. Krejci, I., *et al.*, 713
Influence of clenching intensity on bite force balance, occlusal contact area, and average bite pressure. Hidaka, O., *et al.*, 1336
Morphologic and biochemical changes of the masseter muscles induced by occlusal wear: studies in a rat model. Bani, D., *et al.*, 1735
Occlusal disharmonies modulate central catecholaminergic activity in the rat. Areso, M.P., *et al.*, 1204

DENTAL PLAQUE
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245

DENTAL PROPHYLAXIS
Optimum time to initiate habitual xylitol gum-chewing for obtaining long-term caries prevention, The. Hujoel, P.P., 797
Preventive dental behaviors and their association with oral health status in older white men. Boehmer, U., *et al.*, 869

DENTAL PROSTHESIS
Theoretical optimal center of rotation for a temporomandibular joint prosthesis, The: a three-dimensional kinematic study. van Loon, J.-P., *et al.*, 43

DENTAL PROSTHESIS, IMPLANT-SUPPORTED
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: evaluation of masticatory function, A. Tang, L., *et al.*, 1544

DENTAL PULP
Activation of excitatory amino acid receptors

in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54
Co-increase of nerve fibers and HLA-DR- and/or factor-XIIIa-expressing dendritic cells in dentinal caries-affected regions of the human dental pulp: an immunohistochemical study. Sakurai, K., *et al.*, 1596
Localization and changes in NADPH-diaphorase reactivity and nitric oxide synthase immunoreactivity in rat pulp following tooth preparation. Law, A.S., *et al.*, 1585
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673

DENTAL RESEARCH (*see* Research)

DENTAL RESTORATION, PERMANENT
Damage modes in dental layer structures. Jung, Y.-G., *et al.*, 887

DENTAL RESTORATION WEAR
Influence of antagonist standardization on wear. Krejci, I., *et al.*, 713
Three-body wear of a hand-consolidated silver alternative to amalgam. Xu, H.H.K., *et al.*, 1560

DENTAL SAC
Synthesis and secretion of MCP-1 by dental follicle cells—implications for tooth eruption. Wise, G.E., *et al.*, 1677

DENTAL SCALING
Clonal infection with *Actinobacillus actinomycetemcomitans* following periodontal therapy. Ehmke, B., *et al.*, 1518

DENTIN
Acid-etching and hydration influence on dentin roughness and wettability. Rosales, J.I., *et al.*, 1554
Effects of dentin depth and cavity configuration on bond strength. Yoshikawa, T., *et al.*, 898
Fluoride release from restorative materials and its effects on dentin demineralization. Francci, C., *et al.*, 1647
Identification of the chondrogenic-inducing activity from bovine dentin (bCIA) as a low-molecular-mass amelogenin polypeptide. Nebgen, D.R., *et al.*, 1484
Predominant *Actinomyces* spp. isolated from infected dentin of active root caries lesions, The. Brailsford, S.R., *et al.*, 1525
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221
Ultrastructural properties of laser-irradiated and heat-treated dentin. Rohanizadeh, R., *et al.*, 1829

DENTIN-BONDING AGENTS
Acid-etching and hydration influence on dentin roughness and wettability. Rosales, J.I., *et al.*, 1554
Effect of moist *vs.* dry bonding to normal *vs.* caries-affected dentin with Scotchbond Multi-Purpose Plus. Nakajima, M., *et al.*, 1298
Effects of dentin depth and cavity configuration on bond strength. Yoshikawa, T., *et al.*, 898
Fluoride release from restorative materials and its effects on dentin demineralization. Francci, C., *et al.*, 1647
Long-term durability of dentin bonds made with a self-etching primer, *in vivo*. Sano, H., *et al.*, 906
Regional measurement of resin-dentin bonding as an array. Shono, Y., *et al.*, 699

DENTINOGENESIS
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673

DENTINOGENESIS IMPERFECTA
Genetic linkage of the dentinogenesis imperfecta type III locus to chromosome 4q. MacDougall, M., *et al.*, 1277

DENTISTRY
Development of experimental oral carcinogenesis and its impact on current oral cancer research. Shklar, G., 1768
Emergence of the social and behavioral sciences in dentistry, The: Lois Cohen as principal architect. Dworkin, S.F., 1192
Guest editorial: evidence-based dentistry and the dental research community. Bader, J., *et al.*, 1480
Guest editorial: failure to attract and retain clinician/scientist faculty puts our profession at risk. Krebsbach, P.H. and Ignelzi, M.A., Jr., 1576
New scientists, and the new science, The. Bayne, S.C., 1386

DENTITION
Forty-five-year tooth survival probabilities among men in Oslo, Norway. Hujoel, P.P., *et al.*, 815 (erratum)

DENTITION, PRIMARY
Production of matrix-degrading enzymes and inhibition of osteoclast-like cell differentiation by fibroblast-like cells from the periodontal ligament of human primary teeth. Wu, Y.-M., *et al.*, 681

DENTURE, OVERLAY
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: evaluation of masticatory function, A. Tang, L., *et al.*, 1544

DENTURES
Natural defenses against Candida colonization breakdown in the oral cavities of the elderly. Lockhart, S.R., *et al.*, 857
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640

dltd BASAL LAMINA (*see* Basement Membrane)

DNA, COMPLEMENTARY
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11

DNA SEQUENCING (*see* Sequence Analysis, DNA)

DOGS
Non-steroidal anti-inflammatory drugs for altering periodontal bone loss. Williams, R.C., 638

DOPAMINE
Occlusal disharmonies modulate central catecholaminergic activity in the rat. Areso, M.P., *et al.*, 1204

DYES
Origin of sensory and autonomic innervation of the rate temporomandibular joint: a retrograde axonal tracing study with the fluorescent dye fast blue. Casatti, C.A., *et al.*, 776

EDUCATION, DENTAL
Guest editorial: failure to attract and retain clinician/scientist faculty puts our profession at risk. Krebsbach, P.H. and Ignelzi, M.A., Jr., 1576
Oral biology, a dialogue: Solon Arthur Ellison at the State University of New York at Buffalo. Emmings, F.G., 725

ELDERLY (*see* Aged)

ELECTROENCEPHALOGRAPHY
Controlled daytime challenge of motor performance and vigilance in sleep bruxers, A. Major, M., *et al.*, 1754

ELECTROMYOGRAPHY
Controlled daytime challenge of motor performance and vigilance in sleep bruxers, A. Major, M., *et al.*, 1754
Nocturnal masseter EMG activity of healthy subjects in a natural environment. Gallo,

L.M., *et al.*, 1436
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: evaluation of masticatory function, A. Tang, L., *et al.*, 1544

ELECTRON PROBE MICROANALYSIS
Ultrastructural properties of laser-irradiated and heat-treated dentin. Rohanizadeh, R., *et al.*, 1829

ELLISON, SOLON ARTHUR
Oral biology, a dialogue: Solon Arthur Ellison at the State University of New York at Buffalo. Emmings, F.G., 725

EMBRYO DEVELOPMENT (*see* Fetal Development)

ENAMEL (*see* Dental Enamel)

ENAMELYSIN
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743

EPITHELIAL ATTACHMENT
Attrition, eruption, and the periodontium. Newman, H.N., 730

EPITHELIAL CELLS
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Langerhans cells from oral epithelium are more effective in stimulating allogeneic T-cells *in vitro* than Langerhans cells from skin epithelium. Hasséus, B., *et al.*, 751

ETHICS, DENTAL
Guest editorial: evidence-based presentations: science or sham? Barnett, M.L., 5

EVIDENCE-BASED DENTISTRY
Guest editorial: evidence-based dentistry and the dental research community. Bader, J., *et al.*, 1480
Guest editorial: evidence-based presentations: science or sham? Barnett, M.L., 5
Guest editorial: tradition-based dental care and evidence-based dental care. Niederman, R. and Badovinac, R., 1288

EXCITATORY AMINO ACID AGONISTS
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54

EXTRACELLULAR MATRIX
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495
Identification of the chondrogenic-inducing activity from bovine dentin (bCIA) as a low-molecular-mass amelogenin polypeptide. Nebgen, D.R., *et al.*, 1484
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

EXTRACELLULAR SPACE
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

FACIAL BONES
Contribution of jaw muscle size and craniofacial morphology to human bite force magnitude. Raadsheer, M.C., *et al.*, 31
Mandibulofacial adaptations in a juvenile animal model of temporomandibular joint arthritis. Tavakkoli-Jou, M., *et al.*, 1426

FACTOR-XIIIa
Co-increase of nerve fibers and HLA-DR- and/or factor-XIIIa-expressing dendritic cells in dentinal caries-affected regions of the human dental pulp: an immunohistochemical study. Sakurai, K., *et al.*, 1596

FATIGUE
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769

FERRETS
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

FETAL DEVELOPMENT
Molecular genetics of tooth morphogenesis and patterning: the right shape in the right place. Tucker, A.S. and Sharpe, P.T., 826
Prenatal development of the alveolar bone of human deciduous incisors and canines. Kjær, I. and Bagheri, A., 667
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221

FIBROBLAST GROWTH FACTOR
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal repair. Funato, N., *et al.*, 1511
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791

FIBROBLASTS
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal repair. Funato, N., *et al.*, 1511
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791
92K-GL (MMP-9) and 72K-GL (MMP-2) are produced *in vivo* by human oral squamous cell carcinomas and can enhance FIB-CL (MMP-1) activity *in vitro*. Pickett, K.L., *et al.*, 1354
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840
Production of matrix-degrading enzymes and inhibition of osteoclast-like cell differentiation by fibroblast-like cells from the periodontal ligament of human primary teeth. Wu, Y.-M., *et al.*, 681
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

FIBRONECTINS
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20

FLUORESCENT DYES
Origin of sensory and autonomic innervation of the rate temporomandibular joint: a retrograde axonal tracing study with the fluorescent dye fast blue. Casatti, C.A., *et al.*, 776

FLUORIDES
Effect of fluoride concentration and pH on corrosion behavior of titanium for dental use. Nakagawa, M., *et al.*, 1568
Fluoride release from restorative materials and its effects on dentin demineralization. Francci, C., *et al.*, 1647
Stoichiometry of the leaching process of fluoride-containing aluminosilicate glass-ionomer glasses. De Maeyer, E.A.P., *et al.*, 1312

FLURBIPROFEN
Possible involvement of histamine in muscular fatigue in temporomandibular disor-

ders: animal and human studies. Watanabe, M., *et al.*, 769

FRACTURES
Contact damage resistance and strength degradation of glass-infiltrated alumina and spinel ceramics. Jung, Y.-G., *et al.*, 804
Damage modes in dental layer structures. Jung, Y.-G., *et al.*, 887
Three-body wear of a hand-consolidated silver alternative to amalgam. Xu, H.H.K., *et al.*, 1560

FUSOBACTERIUM
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410

GALACTOSAMINE
Secretory immunoglobulin A heavy chain presents Galβ1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

GALACTOSE
Secretory immunoglobulin A heavy chain presents Galβ1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

GELATINASES
92K-GL (MMP-9) and 72K-GL (MMP-2) are produced *in vivo* by human oral squamous cell carcinomas and can enhance FIB-CL (MMP-1) activity *in vitro*. Pickett, K.L., *et al.*, 1354

GENE EXPRESSION
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11
Keratin 19 downregulation by oral squamous cell carcinoma lines increases invasive potential. Crowe, D.L., *et al.*, 1256
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

GENES, BAX
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264

GENES, BCL-1
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

GENES, BCL-2
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

GENES, CST2
Sequence variations of the *CST2* gene related to the polymorphism of salivary cystatin SA. Haga, T. and Minaguchi, K., 835

GENES, HOMEOBOX
Molecular genetics of tooth morphogenesis and patterning: the right shape in the right place. Tucker, A.S. and Sharpe, P.T., 826

GENES, JUN
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673

GENES, P53
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

GENES, SUPPRESSOR, TUMOR
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

GINGIVA
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61

GINGIVITIS
Depressed responsiveness of peripheral blood mononuclear cells to heat-shock proteins in periodontitis patients. Petit, M.D.A., *et al.*, 1393
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410

GLASS
Contact damage resistance and strength degradation of glass-infiltrated alumina and spinel ceramics. Jung, Y.-G., *et al.*, 804
Stoichiometry of the leaching process of fluoride-containing aluminosilicate glass-ionomer glasses. De Maeyer, E.A.P., *et al.*, 1312

GLASS-IONOMER CEMENTS
Fluoride release from restorative materials and its effects on dentin demineralization. Francci, C., *et al.*, 1647
Glass-ionomer restoratives: a systematic review of a secondary caries treatment effect. Randall, R.C. and Wilson, N.H.F., 628
Ion distribution in matrix parts of glass-polyalkenoate cement by SIMS. Maeda, T., *et al.*, 86
Longevity of extensive class II open-sandwich restorations with a resin-modified glass-ionomer cement. van Dijken, J.W.V., *et al.*, 1319
Stoichiometry of the leaching process of fluoride-containing aluminosilicate glass-ionomer glasses. De Maeyer, E.A.P., *et al.*, 1312

GLOSSOPHARYNGEAL NERVE
Capsaicin induces cystatin S-like substances

in submandibular saliva of the rat. Katsukawa, H. and Ninomiya, Y., 1609

GLUTAMATES
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54

GLUTAMINE
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696

GLYCANS (*see* Polysaccharides)

GLYCOPROTEINS
Growth of viridans streptococci on human serum α_1-acid glycoprotein. Byers, H.L., *et al.*, 1370
Secretory immunoglobulin A heavy chain presents Galβ1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

GLYCOSAMINOGLYCAN
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

GLYCOSIDE HYDROLASES
Growth of viridans streptococci on human serum α_1-acid glycoprotein. Byers, H.L., *et al.*, 1370

GOLDSWORTHY, NEIL
Neil Goldsworthy and his legacy: Sydney's Institute of Dental Research. Knox, K.W., 1579

GOLUB, LORNE (LARRY)
Stretching the boundaries of conventional thought: Larry Golub and the tetracycline story. Greenwald, R.A., 820

GRAM-POSITIVE BACTERIAL INFECTIONS
Predominant *Actinomyces* spp. isolated from infected dentin of active root caries lesions, The. Brailsford, S.R., *et al.*, 1525

GRANULOCYTE-MACROPHAGE COLONY-STIMULATING FACTORS, RECOMBINANT
Langerhans cells from oral epithelium are more effective in stimulating allogeneic T-cells *in vitro* than Langerhans cells from skin epithelium. Hasséus, B., *et al.*, 751

HAND STRENGTH
Masticatory force and function in patients with hemispheric brain infarction and hemiplegia. Kemppainen, P., *et al.*, 1810

HEAT
Ultrastructural properties of laser-irradiated and heat-treated dentin. Rohanizadeh, R., *et al.*, 1829

HEAT-SHOCK PROTEINS
Depressed responsiveness of peripheral blood mononuclear cells to heat-shock proteins in periodontitis patients. Petit, M.D.A., *et al.*, 1393

HEMA (*see* Hydroxyethyl Methacrylate [HEMA])

HEMIPLEGIA
Masticatory force and function in patients with hemispheric brain infarction and hemiplegia. Kemppainen, P., *et al.*, 1810

HEPARITIN SULFATE
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791

HINE, MAYNARD KIPLINGER
In memoriam, 917

HISTAMINE
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769

HISTATINS
Construction and characterization of human salivary histatin-5 multimers. Situ, H., *et al.*, 690
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696

HISTIDINE DECARBOXYLASE
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769

HISTORY OF DENTISTRY
Development of experimental oral carcinogenesis and its impact on current oral cancer research. Shklar, G., 1768
Digital subtraction radiography: then (1938) and now (1998). Hausmann, E., 7
Emergence of the social and behavioral sciences in dentistry, The: Lois Cohen as principal architect. Dworkin, S.F., 1192
Neil Goldsworthy and his legacy: Sydney's Institute of Dental Research. Knox, K.W., 1579
Non-steroidal anti-inflammatory drugs for altering periodontal bone loss. Williams, R.C., 638
Oral biology, a dialogue: Solon Arthur Ellison at the State University of New York at Buffalo. Emmings, F.G., 725
Spit is "it". Azen, E.A., 1388
Stretching the boundaries of conventional thought: Larry Golub and the tetracycline story. Greenwald, R.A., 820
Tony Melcher's contributions to the regeneration of the periodontium. McCulloch, C.A., 1292
Voyage to the land of developmental enamel mineralization. Aoba, T., 1673

HIV PROTEASE INHIBITORS
Secretory leukocyte protease inhibitor (SLPI): oxidation of SLPI does not explain its variable anti-HIV activity. Konopka, K., *et al.*, 1773

HLA-DR ANTIGENS
Co-increase of nerve fibers and HLA-DR- and/or factor-XIIIa-expressing dendritic cells in dentinal caries-affected regions of the human dental pulp: an immunohistochemical study. Sakurai, K., *et al.*, 1596

HYDROGEN-ION CONCENTRATION
Effect of fluoride concentration and pH on corrosion behavior of titanium for dental use. Nakagawa, M., *et al.*, 1568

HYDROXYAPATITES
Enhancement by recombinant human bone morphogenetic protein-2 of bone formation by means of porous hydroxyapatite in mandibular bone defects. Yoshida, K., *et al.*, 1505

HYDROXYETHYL METHACRYLATE (HEMA)
Effect of moist *vs.* dry bonding to normal *vs.* caries-affected dentin with Scotchbond Multi-Purpose Plus. Nakajima, M., *et al.*, 1298

HYPERSENSITIVITY, DELAYED
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

HYPOGLOSSAL NERVE
Suppression of jaw-opening and trigemino-hypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

IADR/AADR
IADR: mentor for dental research, The.

Marshall, S.J., 1384

IGA, SECRETORY
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759
Secretory immunoglobulin A heavy chain presents Galβ1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

IMMUNE SERA
Detection and quantification of MUC7 in submandibular, sublingual, palatine, and labial saliva by anti-peptide antiserum. Bolscher, J.G.M., *et al.*, 1362

IMMUNITY, CELLULAR
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

IMMUNOCOMPETENCE
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214

IMMUNOGLOBULINS
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759
Secretory immunoglobulin A heavy chain presents Galβ1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

IMMUNOHISTOCHEMISTRY
Autocrine regulation of osteoclast formation and bone resorption by IL-1α and TNFα. Tani-Ishii, N., *et al.*, 1617
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264
Co-increase of nerve fibers and HLA-DR- and/or factor-XIIIa-expressing dendritic cells in dentinal caries-affected regions of the human dental pulp: an immunohistochemical study. Sakurai, K., *et al.*, 1596
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal repair. Funato, N., *et al.*, 1511
92K-GL (MMP-9) and 72K-GL (MMP-2) are produced *in vivo* by human oral squamous cell carcinomas and can enhance FIB-CL (MMP-1) activity *in vitro*. Pickett, K.L., *et al.*, 1354

IMPLANTS, DENTAL (*see* Dental Implants)

***IN SITU* NICK-END LABELING**
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495

INCISOR
Prenatal development of the alveolar bone of human deciduous incisors and canines. Kjær, I. and Bagheri, A., 667

INDENTATION
Contact damage resistance and strength degradation of glass-infiltrated alumina and spinel ceramics. Jung, Y.-G., *et al.*, 804
Damage modes in dental layer structures. Jung, Y.-G., *et al.*, 887

INFANTS
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634

INFLAMMATION
Localization and changes in NADPH-diaphorase reactivity and nitric oxide synthase immunoreactivity in rat pulp following tooth preparation. Law, A.S., *et al.*, 1585

INFLAMMATION MEDIATORS
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69

INSTITUTE OF DENTAL RESEARCH, SYDNEY
Neil Goldsworthy and his legacy: Sydney's Institute of Dental Research. Knox, K.W., 1579

INTERFERON-GAMMA, RECOMBINANT
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840

INTERFERON TYPE II
Depressed responsiveness of peripheral blood mononuclear cells to heat-shock proteins in periodontitis patients. Petit, M.D.A., *et al.*, 1393

INTERLEUKIN-1
Autocrine regulation of osteoclast formation and bone resorption by IL-1α and TNFα. Tani-Ishii, N., *et al.*, 1617
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61
Synthesis and secretion of MCP-1 by dental follicle cells—implications for tooth eruption. Wise, G.E., *et al.*, 1677

INTERLEUKIN-4
Depressed responsiveness of peripheral blood mononuclear cells to heat-shock proteins in periodontitis patients. Petit, M.D.A., *et al.*, 1393
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840

INTERLEUKIN-6
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840

INTERSTITIAL FLUID (*see* Extracellular Space)

IONS
Ion distribution in matrix parts of glass-polyalkenoate cement by SIMS. Maeda, T., *et al.*, 86

ISOMETRIC CONTRACTION
Cold pressor stimulation effect on hemodynamic changes following sustained isometric contraction in human jaw-closure muscles. Tsukiyama, Y., *et al.*, 1727

JAW
Cold pressor stimulation effect on hemodynamic changes following sustained isometric contraction in human jaw-closure muscles. Tsukiyama, Y., *et al.*, 1727
Contribution of jaw muscle size and craniofacial morphology to human bite force magnitude. Raadsheer, M.C., *et al.*, 31
Intra-articular distance within the TMJ during free and loaded closing movements, The. Huddleston Slater, J.J.R., *et al.*, 1815
Smoothness of human jaw movement during chewing. Yashiro, K., *et al.*, 1662
Speed-dependent control of cyclic open-close movements of the human jaw with an external force counteracting closing. Abbink, J.H., *et al.*, 878
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

KAINIC ACID
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54

KERATIN
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Keratin 19 downregulation by oral squamous cell carcinoma lines increases invasive potential. Crowe, D.L., *et al.*, 1256

KINEMATICS
Intra-articular distance within the TMJ during free and loaded closing movements, The. Huddleston Slater, J.J.R., *et al.*, 1815
Theoretical optimal center of rotation for a temporomandibular joint prosthesis, The: a three-dimensional kinematic study. van Loon, J.-P., *et al.*, 43

KINETICS
Kinetics of enamel demineralization *in vitro*. Margolis, H.C., *et al.*, 1326

L-NAME
(*see* NG-Nitroarginine Methyl Ester)

LACTOBACILLUS
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640

LACTOFERRIN
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759

LANGERHANS CELLS
Langerhans cells from oral epithelium are more effective in stimulating allogeneic T-cells *in vitro* than Langerhans cells from skin epithelium. Hasséus, B., *et al.*, 751

LASERS
Ultrastructural properties of laser-irradiated and heat-treated dentin. Rohanizadeh, R., *et al.*, 1829

LEUKOCYTES
Secretory leukocyte protease inhibitor (SLPI): oxidation of SLPI does not explain its variable anti-HIV activity. Konopka, K., *et al.*, 1773

LEUKOCYTES, MONONUCLEAR
Depressed responsiveness of peripheral blood mononuclear cells to heat-shock proteins in periodontitis patients. Petit, M.D.A., *et al.*, 1393

LICHEN PLANUS, ORAL
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

LIGHT
Effects of light intensity, temperature, and comonomer composition on the polymerization behavior of dimethacrylate dental resins, The. Lovell, L.G., *et al.*, 1469

LINGUAL NERVE
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

LINKAGE (GENETICS)
Genetic linkage of the dentinogenesis imperfecta type III locus to chromosome 4q. MacDougall, M., *et al.*, 1277

LYMPHOCYTE TRANSFORMATION
In vitro lymphoproliferative assays with $HgCl_2$ cannot identify patients with systemic symptoms attributed to dental amalgam. Cederbrant, K., *et al.*, 1450

LYMPHOCYTES
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69

LYSINE
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 169

LYSOZYME (*see* Muramidase)

MACACA
Long-term durability of dentin bonds made with a self-etching primer, *in vivo*. Sano, H., *et al.*, 906

MACROPHAGE-1 ANTIGEN
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214

MAGNETIC RESONANCE IMAGING
Clinical predictability of temporomandibular joint disc displacement. Orsini, M.G., *et al.*, 650

MAJOR HISTOCOMPATIBILITY COMPLEX
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214

MALOCCLUSION, ANGLE CLASS II
Orthodontists' perceptions of the impact of phase 1 treatment for class II malocclusion on phase 2 needs. King, G.J., *et al.*, 1745

MANDIBLE
Enhancement by recombinant human bone morphogenetic protein-2 of bone formation by means of porous hydroxyapatite in mandibular bone defects. Yoshida, K., *et al.*, 1505
Mandibulofacial adaptations in a juvenile animal model of temporomandibular joint arthritis. Tavakkoli-Jou, M., *et al.*, 1426
Myogenic determination and differentiation of the mouse palatal muscle in relation to the developing mandibular nerve. Zhang, L., *et al.*, 1417
Smallest detectable difference in outcome variables related to painful restriction of the temporomandibular joint. Kropmans, Th.J.B., *et al.*, 784
Smallest detectable difference of mandibular function impairment in patients with a painfully restricted temporomandibular joint. Kropmans, Th.J.B., *et al.*, 1445
Theoretical optimal center of rotation for a temporomandibular joint prosthesis, The: a three-dimensional kinematic study. van Loon, J.-P., *et al.*, 43

MANDIBULAR CONDYLE
Intra-articular distance within the TMJ during free and loaded closing movements, The. Huddleston Slater, J.J.R., *et al.*, 1815

MANDIBULAR NERVE
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214
Myogenic determination and differentiation of the mouse palatal muscle in relation to the developing mandibular nerve. Zhang, L., *et al.*, 1417

MASSETER MUSCLE
Cold pressor stimulation effect on hemodynamic changes following sustained iso-

metric contraction in human jaw-closure muscles. Tsukiyama, Y., *et al.*, 1727
Contribution of jaw muscle size and craniofacial morphology to human bite force magnitude. Raadsheer, M.C., *et al.*, 31
Morphologic and biochemical changes of the masseter muscles induced by occlusal wear: studies in a rat model. Bani, D., *et al.*, 1735
Nocturnal masseter EMG activity of healthy subjects in a natural environment. Gallo, L.M., *et al.*, 1436
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769
Speed-dependent control of cyclic open-close movements of the human jaw with an external force counteracting closing. Abbink, J.H., *et al.*, 878

MASTICATION
Attrition, eruption, and the periodontium. Newman, H.N., 730
Influence of clenching intensity on bite force balance, occlusal contact area, and average bite pressure. Hidaka, O., *et al.*, 1336
Smoothness of human jaw movement during chewing. Yashiro, K., *et al.*, 1662
Speed-dependent control of cyclic open-close movements of the human jaw with an external force counteracting closing. Abbink, J.H., *et al.*, 878
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: evaluation of masticatory function, A. Tang, L., *et al.*, 1544

MASTICATORY FORCE (*see* Bite Force)

MASTICATORY MUSCLES
Cold pressor stimulation effect on hemodynamic changes following sustained isometric contraction in human jaw-closure muscles. Tsukiyama, Y., *et al.*, 1727
Contribution of jaw muscle size and craniofacial morphology to human bite force magnitude. Raadsheer, M.C., *et al.*, 31
Influence of clenching intensity on bite force balance, occlusal contact area, and average bite pressure. Hidaka, O., *et al.*, 1336
Masticatory force and function in patients with hemispheric brain infarction and hemiplegia. Kemppainen, P., *et al.*, 1810
Morphologic and biochemical changes of the masseter muscles induced by occlusal wear: studies in a rat model. Bani, D., *et al.*, 1735
Nocturnal masseter EMG activity of healthy subjects in a natural environment. Gallo, L.M., *et al.*, 1436
Speed-dependent control of cyclic open-close movements of the human jaw with an external force counteracting closing. Abbink, J.H., *et al.*, 878
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

MATERIALS TESTING
Influence of antagonist standardization on wear. Krejci, I., *et al.*, 713

MATRIX, EXTRACELLULAR (*see* Extracellular Matrix)

MATRIX METALLOPROTEINASES (*see* Metalloproteinases)

MECHANORECEPTORS
Origin of primary sensory neurons innervating the buccal stretch receptor. Yamamoto, T., *et al.*, 49

MELCHER, TONY
Tony Melcher's contributions to the regeneration of the periodontium. McCulloch, C.A., 1292

MEN
Preventive dental behaviors and their association with oral health status in older white men. Boehmer, U., *et al.*, 869

MERCURY
In vitro lymphoproliferative assays with $HgCl_2$ cannot identify patients with systemic symptoms attributed to dental amalgam. Cederbrant, K., *et al.*, 1450

MESSENGER RNA (*see* RNA, Messenger)

METALLOPROTEINASES
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743
92K-GL (MMP-9) and 72K-GL (MMP-2) are produced *in vivo* by human oral squamous cell carcinomas and can enhance FIB-CL (MMP-1) activity *in vitro*. Pickett, K.L., *et al.*, 1354
Production of matrix-degrading enzymes and inhibition of osteoclast-like cell differentiation by fibroblast-like cells from the periodontal ligament of human primary teeth. Wu, Y.-M., *et al.*, 681

METHACRYLATES
Effects of light intensity, temperature, and comonomer composition on the polymerization behavior of dimethacrylate dental resins, The. Lovell, L.G., *et al.*, 1469

N-METHYLASPARTATE
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54

MICE
Anti-proliferative capsular-like polysaccharide antigen from *Actinobacillus actinomycetemcomitans* induces apoptotic cell death in mouse osteoblastic MC3T3-E1 cells. Yamamoto, S., *et al.*, 1230
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77
Myogenic determination and differentiation of the mouse palatal muscle in relation to the developing mandibular nerve. Zhang, L., *et al.*, 1417
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221

MICROSCOPY, CONFOCAL
Thickness of acquired salivary pellicle as a determinant of the sites of dental erosion. Amaechi, B.T., *et al.*, 1821

MICROSCOPY, ELECTRON
Morphologic and biochemical changes of the masseter muscles induced by occlusal wear: studies in a rat model. Bani, D., *et al.*, 1735
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221

MICROSCOPY, ELECTRON, SCANNING
Ceramic whisker reinforcement of dental resin composites. Xu, H.H.K., *et al.*, 706
Dental composite resins containing silica-fused ceramic single-crystalline whiskers with various filler levels. Xu, H.H.K., 1304
Effect of moist *vs.* dry bonding to normal *vs.* caries-affected dentin with Scotchbond Multi-Purpose Plus. Nakajima, M., *et al.*, 1298
Effects of dentin depth and cavity configuration on bond strength. Yoshikawa, T., *et al.*, 898
Long-term durability of dentin bonds made with a self-etching primer, *in vivo*. Sano, H., *et al.*, 906
Three-body wear of a hand-consolidated silver alternative to amalgam. Xu, H.H.K., *et al.*, 1560
Ultrastructural properties of laser-irradiated and heat-treated dentin. Rohanizadeh, R., *et al.*, 1829

MICROSCOPY, ELECTRON, SCANNING TRANSMISSION
Ultrastructural properties of laser-irradiated and heat-treated dentin. Rohanizadeh,

R., *et al.*, 1829

MICROSCOPY, LIGHT
Morphologic and biochemical changes of the masseter muscles induced by occlusal wear: studies in a rat model. Bani, D., *et al.*, 1735

MIGRATION INHIBITION FACTORS
Migration inhibitory factor related protein-8 (MRP-8) is an autocrine chemotactic factor for periodontal ligament cells. Nishimura, F., *et al.*, 1251

MINERALIZATION (*see* Calcification, Physiologic; Tooth calcification)

MODELS, STATISTICAL
Adjusting estimates of alveolar bone loss for missing observations: developing and testing a general model. Schuller, A.A., *et al.*, 661

MONOCYTE CHEMOATTRACTANT PROTEIN-1
Synthesis and secretion of MCP-1 by dental follicle cells—implications for tooth eruption. Wise, G.E., *et al.*, 1677

MONONUCLEAR LEUKOCYTES (*see* Leukocytes, Mononuclear)

MONOSACCHARIDES
Growth of viridans streptococci on human serum α_1-acid glycoprotein. Byers, H.L., *et al.*, 1370

MORPHOGENESIS
Molecular genetics of tooth morphogenesis and patterning: the right shape in the right place. Tucker, A.S. and Sharpe, P.T., 826

MOTOR ACTIVITY
Controlled daytime challenge of motor performance and vigilance in sleep bruxers, A. Major, M., *et al.*, 1754
Smoothness of human jaw movement during chewing. Yashiro, K., *et al.*, 1662

MOUTH
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634
Langerhans cells from oral epithelium are more effective in stimulating allogeneic T-cells *in vitro* than Langerhans cells from skin epithelium. Hasséus, B., *et al.*, 751
Natural defenses against Candida colonization breakdown in the oral cavities of the elderly. Lockhart, S.R., *et al.*, 857
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640

MOVEMENT
Intra-articular distance within the TMJ during free and loaded closing movements, The. Huddleston Slater, J.J.R., *et al.*, 1815
Smoothness of human jaw movement during chewing. Yashiro, K., *et al.*, 1662

MUCINS
Detection and quantification of MUC7 in submandibular, sublingual, palatine, and labial saliva by anti-peptide antiserum. Bolscher, J.G.M., *et al.*, 1362

MUCOSA (*see* Oral Mucosa)

MUMPS
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

MURAMIDASE
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759

MUSCLE CONTRACTION
Cold pressor stimulation effect on hemodynamic changes following sustained isometric contraction in human jaw-closure muscles. Tsukiyama, Y., *et al.*, 1727

MUSCLE FATIGUE
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769

MYOCARDIAL INFARCTION
Association between extent of periodontal attachment loss and self-reported history of heart attack: an analysis of NHANES III data. Arbes, S.J., Jr., *et al.*, 1777

MYOGENIC REGULATORY FACTORS
Myogenic determination and differentiation of the mouse palatal muscle in relation to the developing mandibular nerve. Zhang, L., *et al.*, 1417

MYOGENIN
Myogenic determination and differentiation of the mouse palatal muscle in relation to the developing mandibular nerve. Zhang, L., *et al.*, 1417

NADPH DEHYDROGENASE
Localization and changes in NADPH-diaphorase reactivity and nitric oxide synthase immunoreactivity in rat pulp following tooth preparation. Law, A.S., *et al.*, 1585

L-NAME (*see* NG-Nitroarginine Methyl Ester)

NATIONAL HEALTH AND NUTRITION EXAMINATION SURVEY (NHANES III)
Association between extent of periodontal attachment loss and self-reported history of heart attack: an analysis of NHANES III data. Arbes, S.J., Jr., *et al.*, 1777

NEOPLASM INVASIVENESS
Keratin 19 downregulation by oral squamous cell carcinoma lines increases invasive potential. Crowe, D.L., *et al.*, 1256

NEOPLASTIC TRANSFORMATION, CELL (*see* Cell Transformation, Neoplastic)

NERVE FIBERS
Co-increase of nerve fibers and HLA-DR- and/or factor-XIIIa-expressing dendritic cells in dentinal caries-affected regions of the human dental pulp: an immunohistochemical study. Sakurai, K., *et al.*, 1596

NEURAMIDASE
Growth of viridans streptococci on human serum α_1-acid glycoprotein. Byers, H.L., *et al.*, 1370

NEURONS, AFFERENT
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214
Origin of primary sensory neurons innervating the buccal stretch receptor. Yamamoto, T., *et al.*, 49
Origin of sensory and autonomic innervation of the rate temporomandibular joint: a retrograde axonal tracing study with the fluorescent dye fast blue. Casatti, C.A., *et al.*, 776

NEUROPEPTIDES
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

NEUROTRANSMITTERS
Occlusal disharmonies modulate central catecholaminergic activity in the rat. Areso, M.P., *et al.*, 1204

NEVOID BASAL CELL CARCINOMA SYNDROME
Expression of cell cycle and apoptosis-related

proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

NG-NITROARGININE METHYL ESTER
Localization and changes in NADPH-diaphorase reactivity and nitric oxide synthase immunoreactivity in rat pulp following tooth preparation. Law, A.S., *et al.*, 1585
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

NITRIC OXIDE
Anti-proliferative capsular-like polysaccharide antigen from *Actinobacillus actinomycetemcomitans* induces apoptotic cell death in mouse osteoblastic MC3T3-E1 cells. Yamamoto, S., *et al.*, 1230
Localization and changes in NADPH-diaphorase reactivity and nitric oxide synthase immunoreactivity in rat pulp following tooth preparation. Law, A.S., *et al.*, 1585
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

NITRIC OXIDE SYNTHASE
Localization and changes in NADPH-diaphorase reactivity and nitric oxide synthase immunoreactivity in rat pulp following tooth preparation. Law, A.S., *et al.*, 1585
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

4-NITROQUINOLINE 1-OXIDE
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264

NUCLEOTIDES
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11

OCTACALCIUM PHOSPHATE
Implantation of octacalcium phosphate (OCP) in rat skull defects enhances bone repair. Kamakura, S., *et al.*, 1682

ODONTOBLASTS
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673

ODONTOGENESIS
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11
Molecular genetics of tooth morphogenesis and patterning: the right shape in the right place. Tucker, A.S. and Sharpe, P.T., 826
Prenatal development of the alveolar bone of human deciduous incisors and canines. Kjær, I. and Bagheri, A., 667

ODONTOGENIC CYSTS
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

ODONTOGENIC TUMORS
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20

OLIGONUCLEOTIDE PROBES
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11

OLIGOSACCHARIDES
Growth of viridans streptococci on human serum α_1-acid glycoprotein. Byers, H.L., *et al.*, 1370
Secretory immunoglobulin A heavy chain presents Galβ1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238

ONCOGENIC PROTEINS
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345

ORAL CAVITY (*see* Mouth)

ORAL HEALTH
Cross-cultural study of oral health values, A. Allison, P., *et al.*, 643
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640

ORAL HYGIENE
Preventive dental behaviors and their association with oral health status in older white men. Boehmer, U., *et al.*, 869

ORAL MEDICINE
Oral biology, a dialogue: Solon Arthur Ellison at the State University of New York at Buffalo. Emmings, F.G., 725

ORAL MUCOSA
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal repair. Funato, N., *et al.*, 1511
Langerhans cells from oral epithelium are more effective in stimulating allogeneic T-cells *in vitro* than Langerhans cells from skin epithelium. Hasséus, B., *et al.*, 751
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410
Origin of primary sensory neurons innervating the buccal stretch receptor. Yamamoto, T., *et al.*, 49

ORAL NEOPLASMS
Development of experimental oral carcinogenesis and its impact on current oral cancer research. Shklar, G., 1768
92K-GL (MMP-9) and 72K-GL (MMP-2) are produced *in vivo* by human oral squamous cell carcinomas and can enhance FIB-CL (MMP-1) activity *in vitro*. Pickett, K.L., *et al.*, 1354
Keratin 19 downregulation by oral squamous cell carcinoma lines increases invasive potential. Crowe, D.L., *et al.*, 1256

OROSOMUCOID
Growth of viridans streptococci on human serum α_1-acid glycoprotein. Byers, H.L., *et al.*, 1370

ORTHODONTICS, CORRECTIVE
Orthodontists' perceptions of the impact of phase 1 treatment for class II malocclusion on phase 2 needs. King, G.J., *et al.*, 1745

OSTEOBLASTS
Anti-proliferative capsular-like polysaccharide antigen from *Actinobacillus actinomycetemcomitans* induces apoptotic cell death in mouse osteoblastic MC3T3-E1 cells. Yamamoto, S., *et al.*, 1230
Extracts of *Actinobacillus actinomycetemcomitans* induce apoptotic cell death in human osteoblastic MG63 cells. Morimoto, Y., *et al.*, 735
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624

OSTEOCALCIN
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624

OSTEOCLASTS
Autocrine regulation of osteoclast formation and bone resorption by IL-1α and TNFα. Tani-Ishii, N., *et al.*, 1617
Production of matrix-degrading enzymes and inhibition of osteoclast-like cell differentiation by fibroblast-like cells from the periodontal ligament of human primary teeth. Wu, Y.-M., *et al.*, 681

OSTEOGENESIS
Enhancement by recombinant human bone morphogenetic protein-2 of bone formation by means of porous hydroxyapatite in mandibular bone defects. Yoshida, K., *et al.*, 1505
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11
Identification of the chondrogenic-inducing activity from bovine dentin (bCIA) as a low-molecular-mass amelogenin polypeptide. Nebgen, D.R., *et al.*, 1484
Implantation of octacalcium phosphate (OCP) in rat skull defects enhances bone repair. Kamakura, S., *et al.*, 1682
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624

OSTEONECTIN
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20

OSTEOPONTIN
Blood circulation as source for osteopontin in acellular extrinsic fiber cementum and other mineralizing tissues. VandenBos, T., *et al.*, 1688

OVERDENTURES (*see* Denture, Overlay)

PAFFENBARGER, GEORGE CORBLY
In memoriam. Rovelstad, G.H., 1672

PAIN
Smallest detectable difference in outcome variables related to painful restriction of the temporomandibular joint. Kropmans, Th.J.B., *et al.*, 784

PALATAL MUSCLES
Myogenic determination and differentiation of the mouse palatal muscle in relation to the developing mandibular nerve. Zhang, L., *et al.*, 1417

PALATE
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal repair. Funato, N., *et al.*, 1511
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

PAPAIN
Structure/function analysis of human cystatin SN and comparison of the cysteine proteinase inhibitory profiles of human cystatins C and SN. Hiltke, T.R., *et al.*, 1401

PAROTID GLAND
Morphological and functional characteristics of acinar atrophy and recovery in the duct-ligated parotid gland of the rat. Scott, J., *et al.*, 1711

PATIENT SATISFACTION
Within-subject comparison of mandibular long-bar and hybrid implant-supported prostheses: evaluation of masticatory function, A. Tang, L., *et al.*, 1544

PELLICLE
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696
Thickness of acquired salivary pellicle as a determinant of the sites of dental erosion. Amaechi, B.T., *et al.*, 1821

PEPTIDE ANTIBIOTICS (*see* Antibiotics, Peptide)

PEPTIDES
Detection and quantification of MUC7 in submandibular, sublingual, palatine, and labial saliva by anti-peptide antiserum. Bolscher, J.G.M., *et al.*, 1362

PERIODONTAL ATTACHMENT LOSS
Association between extent of periodontal attachment loss and self-reported history of heart attack: an analysis of NHANES III data. Arbes, S.J., Jr., *et al.*, 1777

PERIODONTAL DISEASES
Stretching the boundaries of conventional thought: Larry Golub and the tetracycline story. Greenwald, R.A., 820

PERIODONTAL LIGAMENT
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791
Migration inhibitory factor related protein-8 (MRP-8) is an autocrine chemotactic factor for periodontal ligament cells. Nishimura, F., *et al.*, 1251
Production of matrix-degrading enzymes and inhibition of osteoclast-like cell differentiation by fibroblast-like cells from the periodontal ligament of human primary teeth. Wu, Y.-M., *et al.*, 681
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221

PERIODONTITIS
Attrition, eruption, and the periodontium. Newman, H.N., 730
Clonal infection with *Actinobacillus actinomycetemcomitans* following periodontal therapy. Ehmke, B., *et al.*, 1518
Depressed responsiveness of peripheral blood mononuclear cells to heat-shock proteins in periodontitis patients. Petit, M.D.A., *et al.*, 1393
Non-steroidal anti-inflammatory drugs for altering periodontal bone loss. Williams, R.C., 638

PERIODONTITIS, JUVENILE
Anti-proliferative capsular-like polysaccharide antigen from *Actinobacillus actinomycetemcomitans* induces apoptotic cell death in mouse osteoblastic MC3T3-E1 cells. Yamamoto, S., *et al.*, 1230

PERIODONTIUM
Attrition, eruption, and the periodontium. Newman, H.N., 730
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624
Tony Melcher's contributions to the regeneration of the periodontium. McCulloch, C.A., 1292

PEROXIDASES
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759

pH (*see* Hydrogen-Ion Concentration)

PHAGOCYTES
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214

PHOSPHORYLCHOLINE
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77

PIGS (*see* Swine)

POLYALKENOIC ACID
Effect of moist *vs.* dry bonding to normal *vs.* caries-affected dentin with Scotchbond Multi-Purpose Plus. Nakajima, M., *et al.*, 1298

POLYMERASE CHAIN REACTION
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791
Predominant *Actinomyces* spp. isolated from infected dentin of active root caries lesions, The. Brailsford, S.R., *et al.*, 1525
Quantification of bacteria in oral samples by competitive polymerase chain reaction. Rupf, S., *et al.*, 850

POLYMERIZATION
Effects of light intensity, temperature, and comonomer composition on the polymerization behavior of dimethacrylate dental resins, The. Lovell, L.G., *et al.*, 1469

POLYMERIZATION CONTRACTION
Effects of dentin depth and cavity configuration on bond strength. Yoshikawa, T., *et al.*, 898
Longevity of extensive class II open-sandwich restorations with a resin-modified glass-ionomer cement. van Dijken, J.W.V., *et al.*, 1319

POLYMORPHISM (GENETICS)
Refinement of the dentinogenesis imperfecta type II locus to an interval less than 2 centiMorgans at chromosome 4q21 and the creation of yeast artificial chromosome contig of the critical region. Aplin, H.M., *et al.*, 1270
Spit is "it". Azen, E.A., 1388

POLYSACCHARIDES
Anti-proliferative capsular-like polysaccharide antigen from *Actinobacillus actinomycetemcomitans* induces apoptotic cell death in mouse osteoblastic MC3T3-E1 cells. Yamamoto, S., *et al.*, 1230
Growth of viridans streptococci on human serum α_1-acid glycoprotein. Byers, H.L., *et al.*, 1370

PORPHYROMONAS
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634

PREVENTIVE CARE (*see* Dental Prophylaxis)

PREVOTELLA
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410

PROLIFERATING CELL NUCLEAR ANTIGEN
Expression of cell cycle and apoptosis-related proteins in sporadic odontogenic keratocysts and odontogenic keratocysts associated with the nevoid basal cell carcinoma syndrome. Lo Muzio, L., *et al.*, 1345
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495

PROLINE
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696
Spit is "it". Azen, E.A., 1388

PROSTAGLANDIN-ENDOPEROXIDE SYNTHASE
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61

PROSTAGLANDINS
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61

PROSTHESES AND IMPLANTS
Theoretical optimal center of rotation for a temporomandibular joint prosthesis, The: a three-dimensional kinematic study. van Loon, J.-P., *et al.*, 43

PROTEASE INHIBITORS
Secretory leukocyte protease inhibitor (SLPI): oxidation of SLPI does not explain its variable anti-HIV activity. Konopka, K., *et al.*, 1773

PROTEIN KINASE C
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840

PROTEOGLYCANS
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

PROTO-ONCOGENES
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673

QUESTIONNAIRES
Smallest detectable difference of mandibular function impairment in patients with a painfully restricted temporomandibular joint. Kropmans, Th.J.B., *et al.*, 1445

RABBITS
Enhancement by recombinant human bone morphogenetic protein-2 of bone formation by means of porous hydroxyapatite in mandibular bone defects. Yoshida, K., *et al.*, 1505
Mandibulofacial adaptations in a juvenile animal model of temporomandibular joint arthritis. Tavakkoli-Jou, M., *et al.*, 1426

RADIOGRAPHY, DENTAL
Digital subtraction radiography: then (1938) and now (1998). Hausmann, E., 7

RATS
Capsaicin induces cystatin S-like substances in submandibular saliva of the rat. Katsukawa, H. and Ninomiya, Y., 1609
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal

repair. Funato, N., *et al.*, 1511
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11
Force-induced rapid changes in cell fate at midpalatal suture cartilage of growing rats. Kobayashi, E.T., *et al.*, 1495
Implantation of octacalcium phosphate (OCP) in rat skull defects enhances bone repair. Kamakura, S., *et al.*, 1682
Langerhans cells from oral epithelium are more effective in stimulating allogeneic T-cells *in vitro* than Langerhans cells from skin epithelium. Hasséus, B., *et al.*, 751
Localization and changes in NADPH-diaphorase reactivity and nitric oxide synthase immunoreactivity in rat pulp following tooth preparation. Law, A.S., *et al.*, 1585
Morphologic and biochemical changes of the masseter muscles induced by occlusal wear: studies in a rat model. Bani, D., *et al.*, 1735
Morphological and functional characteristics of acinar atrophy and recovery in the duct-ligated parotid gland of the rat. Scott, J., *et al.*, 1711
Occlusal disharmonies modulate central catecholaminergic activity in the rat. Areso, M.P., *et al.*, 1204
Origin of primary sensory neurons innervating the buccal stretch receptor. Yamamoto, T., *et al.*, 49
Origin of sensory and autonomic innervation of the rate temporomandibular joint: a retrograde axonal tracing study with the fluorescent dye fast blue. Casatti, C.A., *et al.*, 776
Synthesis and secretion of MCP-1 by dental follicle cells—implications for tooth eruption. Wise, G.E., *et al.*, 1677
Temporal and spatial expression of *c-jun* and *jun-B* proto-oncogenes in pulp cells involved with reparative dentinogenesis after cavity preparation of rat molars. Kitamura, C., *et al.*, 673

REACTION TIME
Controlled daytime challenge of motor performance and vigilance in sleep bruxers, A. Major, M., *et al.*, 1754

RECEPTORS, DOPAMINE
Occlusal disharmonies modulate central catecholaminergic activity in the rat. Areso, M.P., *et al.*, 1204

RECEPTORS, FIBROBLAST GROWTH FACTOR
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791

RECEPTORS, GLUTAMATE
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54

RECEPTORS, KAINIC ACID
Activation of excitatory amino acid receptors in bovine dental pulp evokes the release of iCGRP. Jackson, D.L. and Hargreaves, K.M., 54

RECOMBINANT PROTEINS
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743
Construction and characterization of human salivary histatin-5 multimers. Situ, H., *et al.*, 690

RECOVERY OF FUNCTION
Morphological and functional characteristics of acinar atrophy and recovery in the duct-ligated parotid gland of the rat. Scott, J., *et al.*, 1711

REFLEX
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

REGENERATION
Recombinant human bone morphogenetic protein-2 stimulates osteoblastic differentiation in cells isolated from human periodontal ligament. Kobayashi, M., *et al.*, 1624
Tony Melcher's contributions to the regeneration of the periodontium. McCulloch, C.A., 1292

RESEARCH
Development of experimental oral carcinogenesis and its impact on current oral cancer research. Shklar, G., 1768
Digital subtraction radiography: then (1938) and now (1998). Hausmann, E., 7
Emergence of the social and behavioral sciences in dentistry, The: Lois Cohen as principal architect. Dworkin, S.F., 1192
Guest editorial: evidence-based dentistry and the dental research community. Bader, J., *et al.*, 1480
Guest editorial: failure to attract and retain clinician/scientist faculty puts our profession at risk. Krebsbach, P.H. and Ignelzi, M.A., Jr., 1576
IADR: mentor for dental research, The. Marshall, S.J., 1384
Neil Goldsworthy and his legacy: Sydney's Institute of Dental Research. Knox, K.W., 1579
New scientists, and the new science, The. Bayne, S.C., 1386
Non-steroidal anti-inflammatory drugs for altering periodontal bone loss. Williams, R.C., 638
Spit is "it". Azen, E.A., 1388
Stretching the boundaries of conventional thought: Larry Golub and the tetracycline story. Greenwald, R.A., 820
Tony Melcher's contributions to the regeneration of the periodontium. McCulloch, C.A., 1292
Voyage to the land of developmental enamel mineralization. Aoba, T., 1673

RESIN COMPOSITES (*see* Composites)

RESINS
Biodegradation of commercial dental composites by cholesterol esterase. Santerre, J.P., *et al.*, 1459
Ceramic whisker reinforcement of dental resin composites. Xu, H.H.K., *et al.*, 706
Dental composite resins containing silica-fused ceramic single-crystalline whiskers with various filler levels. Xu, H.H.K., 1304
Effect of moist *vs.* dry bonding to normal *vs.* caries-affected dentin with Scotchbond Multi-Purpose Plus. Nakajima, M., *et al.*, 1298
Effects of dentin depth and cavity configuration on bond strength. Yoshikawa, T., *et al.*, 898
Effects of light intensity, temperature, and comonomer composition on the polymerization behavior of dimethacrylate dental resins, The. Lovell, L.G., *et al.*, 1469
Fluoride release from restorative materials and its effects on dentin demineralization. Francci, C., *et al.*, 1647
Long-term durability of dentin bonds made with a self-etching primer, *in vivo*. Sano, H., *et al.*, 906
Longevity of extensive class II open-sandwich restorations with a resin-modified glass-ionomer cement. van Dijken, J.W.V., *et al.*, 1319
Regional measurement of resin-dentin bonding as an array. Shono, Y., *et al.*, 699

REVERSE TRANSCRIPTION POLYMERASE CHAIN REACTION
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791

RIBOTYPING
(*see* Bacterial Typing Techniques)

RNA, MESSENGER
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69

Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

ROOT CARIES
Diversity and distribution of the predominant ribotypes of *Actinomyces naeslundii* genospecies 1 and 2 in samples from enamel and from healthy and carious root surfaces of teeth, The. Bowden, G.H.W., *et al.*, 1800
Predominant *Actinomyces* spp. isolated from infected dentin of active root caries lesions, The. Brailsford, S.R., *et al.*, 1525

ROOT RESORPTION
Production of matrix-degrading enzymes and inhibition of osteoclast-like cell differentiation by fibroblast-like cells from the periodontal ligament of human primary teeth. Wu, Y.-M., *et al.*, 681

ROTATION
Theoretical optimal center of rotation for a temporomandibular joint prosthesis, The: a three-dimensional kinematic study. van Loon, J.-P., *et al.*, 43

RUFFINI ENDINGS (*see* Mechanoreceptors)

SALIVA
Capsaicin induces cystatin S-like substances in submandibular saliva of the rat. Katsukawa, H. and Ninomiya, Y., 1609
Construction and characterization of human salivary histatin-5 multimers. Situ, H., *et al.*, 690
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759
Detection and quantification of MUC7 in submandibular, sublingual, palatine, and labial saliva by anti-peptide antiserum. Bolscher, J.G.M., *et al.*, 1362
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640
Secretory leukocyte protease inhibitor (SLPI): oxidation of SLPI does not explain its variable anti-HIV activity. Konopka, K., *et al.*, 1773
Thickness of acquired salivary pellicle as a determinant of the sites of dental erosion. Amaechi, B.T., *et al.*, 1821

SALIVARY GLANDS
Capsaicin induces cystatin S-like substances in submandibular saliva of the rat. Katsukawa, H. and Ninomiya, Y., 1609
Morphological and functional characteristics of acinar atrophy and recovery in the duct-ligated parotid gland of the rat. Scott, J., *et al.*, 1711

SALIVARY PROTEINS
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696
Secretory immunoglobulin A heavy chain presents Galβ1-3GalNAc binding structures for *Actinomyces naeslundii* genospecies 1. Bratt, P., *et al.*, 1238
Sequence variations of the *CST2* gene related to the polymorphism of salivary cystatin SA. Haga, T. and Minaguchi, K., 835
Spit is "it". Azen, E.A., 1388

SCALING, SUBGINGIVAL (*see* Dental Scaling)

SCIENCE
New scientists, and the new science, The. Bayne, S.C., 1386

SEDATIVES, NONBARBITURATE
Randomized clinical trial of triazolam in 3- to 5-year olds, A. Raadal, M., *et al.*, 1197

SENSORY NEURONS (*see* Neurons, Afferent)

SEQUENCE ANALYSIS, DNA
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11
Sequence variations of the *CST2* gene related to the polymorphism of salivary cystatin SA. Haga, T. and Minaguchi, K., 835

SHRINKAGE (*see* Polymerization Contraction)

SIALIDASE (*see* Neuramidase)

SIALOGLYCOPROTEINS
Refinement of the dentinogenesis imperfecta type II locus to an interval less than 2 centiMorgans at chromosome 4q21 and the creation of yeast artificial chromosome contig of the critical region. Aplin, H.M., *et al.*, 1270

SIGNAL TRANSDUCTION
Molecular genetics of tooth morphogenesis and patterning: the right shape in the right place. Tucker, A.S. and Sharpe, P.T., 826
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61

SILANES
Ceramic whisker reinforcement of dental resin composites. Xu, H.H.K., *et al.*, 706

SILICA
Ceramic whisker reinforcement of dental resin composites. Xu, H.H.K., *et al.*, 706
Dental composite resins containing silica-fused ceramic single-crystalline whiskers with various filler levels. Xu, H.H.K., 1304

SILVER
Three-body wear of a hand-consolidated silver alternative to amalgam. Xu, H.H.K., *et al.*, 1560

SKULL
Implantation of octacalcium phosphate (OCP) in rat skull defects enhances bone repair. Kamakura, S., *et al.*, 1682

SLEEP
Controlled daytime challenge of motor performance and vigilance in sleep bruxers, A. Major, M., *et al.*, 1754
Nocturnal masseter EMG activity of healthy subjects in a natural environment. Gallo, L.M., *et al.*, 1436

SOCIAL SCIENCES
Emergence of the social and behavioral sciences in dentistry, The: Lois Cohen as principal architect. Dworkin, S.F., 1192

SORBITOL
Optimum time to initiate habitual xylitol gum-chewing for obtaining long-term caries prevention, The. Hujoel, P.P., 797

SPECTROMETRY, MASS, SECONDARY ION
Ion distribution in matrix parts of glass-polyalkenoate cement by SIMS. Maeda, T., *et al.*, 86

SPECTROSCOPY, NEAR-INFRARED
Cold pressor stimulation effect on hemodynamic changes following sustained isometric contraction in human jaw-closure

muscles. Tsukiyama, Y., *et al.*, 1727

SPINEL
Contact damage resistance and strength degradation of glass-infiltrated alumina and spinel ceramics. Jung, Y.-G., *et al.*, 804

STAPHYLOCOCCUS AUREUS
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410

STATE UNIVERSITY OF NEW YORK AT BUFFALO
Oral biology, a dialogue: Solon Arthur Ellison at the State University of New York at Buffalo. Emmings, F.G., 725

STATHERIN
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696

STATISTICS
Adjusting estimates of alveolar bone loss for missing observations: developing and testing a general model. Schuller, A.A., *et al.*, 661
Forty-five-year tooth survival probabilities among men in Oslo, Norway. Hujoel, P.P., *et al.*, 815 (erratum)

STEATITE
Influence of antagonist standardization on wear. Krejci, I., *et al.*, 713

STOICHIOMETRY
Stoichiometry of the leaching process of fluoride-containing aluminosilicate glass-ionomer glasses. De Maeyer, E.A.P., *et al.*, 1312

STREPTOCOCCUS
Dominant cross-reactive antibodies generated during the response to a variety of oral bacterial species detect phosphorylcholine. Gmür, R., *et al.*, 77
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245

STREPTOCOCCUS MUTANS
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640

STREPTOCOCCUS VIRIDANS
Cumulative correlations of lysozyme, lactoferrin, peroxidase, S-IgA, amylase, and total protein concentrations with adherence of oral viridans streptococci to microplates coated with human saliva. Rudney, J.D., *et al.*, 759
Growth of viridans streptococci on human serum α_1-acid glycoprotein. Byers, H.L., *et al.*, 1370

STREPTODORNASE AND STREPTOKINASE
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

STRETCH RECEPTORS (*see* Mechanoreceptors)

STROKE (*see* Cerebrovascular Disorders)

SUBMANDIBULAR GLAND
Capsaicin induces cystatin S-like substances in submandibular saliva of the rat. Katsukawa, H. and Ninomiya, Y., 1609

SUBSTANCE P
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

SURFACE PROPERTIES
Acid-etching and hydration influence on dentin roughness and wettability. Rosales, J.I., *et al.*, 1554

SURVIVAL ANALYSIS
Forty-five-year tooth survival probabilities among men in Oslo, Norway. Hujoel, P.P., *et al.*, 815 (erratum)

SWALLOWING (*see* Deglutition)

SWEDEN
Variations in dental anxiety among middle-aged and elderly women in Sweden: a longitudinal study between 1968 and 1996. Hägglin, C., *et al.*, 1655

SWINE
Characterization of recombinant pig enamelysin activity and cleavage of recombinant pig and mouse amelogenins. Ryu, O.H., *et al.*, 743

SYNDECANS
Expression of syndecan-2, -4 and fibroblast growth factor receptor type 1 in human periodontal ligament fibroblasts and down-regulation of these membrane proteins during maturation in culture. Shimazu, A., *et al.*, 1791

T-LYMPHOCYTES
Depressed responsiveness of peripheral blood mononuclear cells to heat-shock proteins in periodontitis patients. Petit, M.D.A., *et al.*, 1393
Direct interaction between gingival fibroblasts and lymphoid cells induces inflammatory cytokine mRNA expression in gingival fibroblasts. Murakami, S., *et al.*, 69
Langerhans cells from oral epithelium are more effective in stimulating allogeneic T-cells *in vitro* than Langerhans cells from skin epithelium. Hasséus, B., *et al.*, 751
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

T-LYMPHOCYTES, INDUCER-HELPER
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

TEGDMA (*see* Triethylene Glycol Dimethacrylate)

TEMPERATURE
Effects of light intensity, temperature, and comonomer composition on the polymerization behavior of dimethacrylate dental resins, The. Lovell, L.G., *et al.*, 1469

TEMPORAL MUSCLE
Cold pressor stimulation effect on hemodynamic changes following sustained isometric contraction in human jaw-closure muscles. Tsukiyama, Y., *et al.*, 1727
Contribution of jaw muscle size and craniofacial morphology to human bite force magnitude. Raadsheer, M.C., *et al.*, 31

TEMPOROMANDIBULAR JOINT
Intra-articular distance within the TMJ during free and loaded closing movements, The. Huddleston Slater, J.J.R., *et al.*, 1815
Origin of sensory and autonomic innervation of the rate temporomandibular joint: a retrograde axonal tracing study with the fluorescent dye fast blue. Casatti, C.A., *et al.*, 776
Smallest detectable difference in outcome variables related to painful restriction of the temporomandibular joint. Kropmans, Th.J.B., *et al.*, 784
Theoretical optimal center of rotation for a temporomandibular joint prosthesis, The: a three-dimensional kinematic study. van Loon, J.-P., *et al.*, 43

TEMPOROMANDIBULAR JOINT DISC
Clinical predictability of temporomandibular joint disc displacement. Orsini, M.G., *et*

al., 650

TEMPOROMANDIBULAR JOINT DISORDERS
Mandibulofacial adaptations in a juvenile animal model of temporomandibular joint arthritis. Tavakkoli-Jou, M., *et al.*, 1426
Possible involvement of histamine in muscular fatigue in temporomandibular disorders: animal and human studies. Watanabe, M., *et al.*, 769
Smallest detectable difference of mandibular function impairment in patients with a painfully restricted temporomandibular joint. Kropmans, Th.J.B., *et al.*, 1445

TENSILE STRENGTH
Effect of moist *vs.* dry bonding to normal *vs.* caries-affected dentin with Scotchbond Multi-Purpose Plus. Nakajima, M., *et al.*, 1298
Long-term durability of dentin bonds made with a self-etching primer, *in vivo*. Sano, H., *et al.*, 906
Regional measurement of resin-dentin bonding as an array. Shono, Y., *et al.*, 699

TETRACYCLINE
Stretching the boundaries of conventional thought: Larry Golub and the tetracycline story. Greenwald, R.A., 820

TISSUE INHIBITOR OF METALLOPROTEINASES
Production of matrix-degrading enzymes and inhibition of osteoclast-like cell differentiation by fibroblast-like cells from the periodontal ligament of human primary teeth. Wu, Y.-M., *et al.*, 681

TITANIUM
Effect of fluoride concentration and pH on corrosion behavior of titanium for dental use. Nakagawa, M., *et al.*, 1568

TONGUE
Changes in Bcl-2 and Bax expression in rat tongue during 4-nitroquinoline 1-oxide-induced carcinogenesis. Nishimura, A., 1264
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

TOOTH
Damage modes in dental layer structures. Jung, Y.-G., *et al.*, 887
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11

TOOTH ABRASION
Influence of antagonist standardization on wear. Krejci, I., *et al.*, 713
Morphologic and biochemical changes of the masseter muscles induced by occlusal wear: studies in a rat model. Bani, D., *et al.*, 1735

TOOTH ATTRITION
Attrition, eruption, and the periodontium. Newman, H.N., 730

TOOTH CALCIFICATION
Blood circulation as source for osteopontin in acellular extrinsic fiber cementum and other mineralizing tissues. VandenBos, T., *et al.*, 1688

TOOTH DEMINERALIZATION
Fluoride release from restorative materials and its effects on dentin demineralization. Francci, C., *et al.*, 1647
Kinetics of enamel demineralization *in vitro*. Margolis, H.C., *et al.*, 1326
Thickness of acquired salivary pellicle as a determinant of the sites of dental erosion. Amaechi, B.T., *et al.*, 1821

TOOTH EROSION
Thickness of acquired salivary pellicle as a determinant of the sites of dental erosion. Amaechi, B.T., *et al.*, 1821

TOOTH ERUPTION
Attrition, eruption, and the periodontium. Newman, H.N., 730
Optimum time to initiate habitual xylitol gum-chewing for obtaining long-term caries prevention, The. Hujoel, P.P., 797
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221
Synthesis and secretion of MCP-1 by dental follicle cells—implications for tooth eruption. Wise, G.E., *et al.*, 1677

TOOTH GERM
Molecular genetics of tooth morphogenesis and patterning: the right shape in the right place. Tucker, A.S. and Sharpe, P.T., 826

TOOTH LOSS
Adjusting estimates of alveolar bone loss for missing observations: developing and testing a general model. Schuller, A.A., *et al.*, 661
Forty-five-year tooth survival probabilities among men in Oslo, Norway. Hujoel, P.P., *et al.*, 815 (erratum)

TOOTH MOVEMENT
Delayed recruitment of immunocompetent cells in denervated rat periodontal ligament following experimental tooth movement. Vandevska-Radunovic, V., *et al.*, 1214

TOOTH ROOT
Root development in mice lacking functional tissue non-specific alkaline phosphatase gene: inhibition of acellular cementum formation. Beertsen, W., *et al.*, 1221

TOOTH ROOT CARIES (*see* Root Caries)

TOOTHBRUSHING
Preventive dental behaviors and their association with oral health status in older white men. Boehmer, U., *et al.*, 869

TRANSFORMING GROWTH FACTOR ALPHA
Autocrine regulation of osteoclast formation and bone resorption by IL-1α and TNFα. Tani-Ishii, N., *et al.*, 1617
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

TRANSFORMING GROWTH FACTOR BETA
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal repair. Funato, N., *et al.*, 1511
Synthesis and secretion of MCP-1 by dental follicle cells—implications for tooth eruption. Wise, G.E., *et al.*, 1677
TGFβ isoforms and decorin gene expression are modified in fibroblasts obtained from non-syndromic cleft lip and palate subjects. Bodo, M., *et al.*, 1783

TRANSGLUTAMINASE
Pellicle precursor proteins: acidic proline-rich proteins, statherin, and histatins, and their crosslinking reaction by oral transglutaminase. Yao, Y., *et al.*, 1696

TRIAZOLAM
Randomized clinical trial of triazolam in 3- to 5-year olds, A. Raadal, M., *et al.*, 1197

TRIETHYLENE GLYCOL DIMETHACRYLATE
Effects of light intensity, temperature, and comonomer composition on the polymerization behavior of dimethacrylate dental resins, The. Lovell, L.G., *et al.*, 1469

TRIGEMINAL NERVE
Origin of primary sensory neurons innervating the buccal stretch receptor. Yamamoto, T., *et al.*, 49
Suppression of jaw-opening and trigeminohypoglossal reflexes during swallowing in the cat. Ono, T., *et al.*, 1720

TUBERCULIN
Reduced *in vivo* cell-mediated immune responses to mumps, tuberculin, and streptokinase/streptodornase but not to *Candida albicans* in oral lichen planus. Simark-Mattsson, C., *et al.*, 1704

TUMOR NECROSIS FACTOR
Intracellular interleukin-1α production in human gingival fibroblasts is differentially regulated by various cytokines. Kobayashi, M., *et al.*, 840
Signal transduction pathways involved in the synergistic stimulation of prostaglandin production by interleukin-1β and tumor necrosis factor α in human gingival fibroblasts. Yucel-Lindberg, T., *et al.*, 61

TUMOR SUPPRESSOR GENES
(*see* Genes, Suppressor, Tumor)

TUNEL ASSAY
(*see In Situ* Nick-End Labeling)

3′ UNTRANSLATED REGIONS
Expression of collagen α1(I) mRNA variants during tooth and bone formation in the rat. Brandsten, C., *et al.*, 11

VASODILATION
Role of sensory neuropeptides and nitric oxide on pulpal blood flow and tissue pressure in the ferret, The. Berggreen, E. and Heyeraas, K.J., 1535

VEILLONELLA
Effects of histatin-derived basic antimicrobial peptides on oral biofilms, The. Helmerhorst, E.J., *et al.*, 1245
Establishment of oral anaerobes during the first year of life. Könönen, E., *et al.*, 1634

VIGILANCE, CORTICAL
(*see* Arousal)

VIMENTIN
Aberrant gene expression in epithelial cells of mixed odontogenic tumors. Papagerakis, P., *et al.*, 20

WEAR (*see* Dental Restoration Wear; Tooth Abrasion)

WEAR RESISTANCE
(*see* Abrasion Resistance)

WETTABILITY
Acid-etching and hydration influence on dentin roughness and wettability. Rosales, J.I., *et al.*, 1554

WOMEN
Variations in dental anxiety among middle-aged and elderly women in Sweden: a longitudinal study between 1968 and 1996. Hägglin, C., *et al.*, 1655

WOUND HEALING
Evidence for apoptosis induction in myofibroblasts during palatal mucoperiosteal repair. Funato, N., *et al.*, 1511

XEROSTOMIA
Oral microflora in subjects with reduced salivary secretion. Almståhl, A. and Wikström, M., 1410

XYLITOL
Optimum time to initiate habitual xylitol gum-chewing for obtaining long-term caries prevention, The. Hujoel, P.P., 797

YEAST ARTIFICIAL CHROMOSOMES
(*see* Chromosomes, Yeast Artificial)

YEASTS
Saliva, salivary micro-organisms, and oral health in the home-dwelling old elderly—a five-year longitudinal study. Närhi, T.O., *et al.*, 1640
